

Some things that I took from the program is the importance of mental health in the veterinary field, the rigorous amount of work it takes to become a vet, and how rewarding it can be. My three favorite things about the program was the horse treadmill, dissecting specimens, and watching a portion of a horse necropsy. The program solidified my decision to become a vet and pursue my dream. It was also an amazing feeling to be treated like an adult instead of a child. Thank you!
