I understand the Oregon Veterinary Diagnostic Laboratory (OVDL) cannot guarantee a definitive diagnosis.

I understand the OVDL can conduct certain diagnostic tests and procedures and make observations and deductions based upon those results. The test results may or may not reflect the problem(s) responsible for the submission of the specimens. The results should be considered with the knowledge that management and environmental factors may be of equal or greater importance. The laboratory tests may not help identify management and environmental conditions.

I understand that if the examinations and tests are negative, the OVDL may have no basis on which to make a diagnosis.

I understand that the OVDL does not recommend or prescribe treatment.

OVDL will send a report of any test results to client. However, any information and intellectual property identified by or arising from the Laboratory's handling of the specimens belongs to the University.

Post necropsy, remains will only be released to a licensed crematory service. Arrangements must be made directly with crematory service by submitter or client. If cremation is selected the OVDL must be notified of arrangements within 3 business days. Routine disposal will be completed if no notification is received or no selection is made.
