

Respiratory

- Nasopharyngeal stenting
- Tracheal stenting
- Tracheal balloon dilation
- Bronchoscopic-assisted tracheobronchial foreign body removal
- Fluoroscopic-assisted tracheobronchial foreign body removal
- CT-Guided lung biopsy

Gastrointestinal

- Esophageal balloon dilation
- Esophageal stenting
- PEG: Percutaneous endoscopically-placed gastric tubes
- Jejunostomy through PEG tube
- Colonic stenting
- Laser ablation of colonic polyps
- Anorectal balloon dilation

Hepatobiliary

- Hepatic vascular stenting (for vascular obstruction secondary to tumors)
- Percutaneous transjugular coil embolization for PSS

Genitourinary

- Urethra
 - Urethral stenting
 - Urethral balloon dilation
 - CLA-EU: Cystoscopic-guided laser ablation of ectopic ureters
 - Laser lithotripsy for urethral stones
 - Antegrade urethral catheterization
- Bladder
 - Laser lithotripsy for bladder stones
 - Cystoscopic-assisted stone removal
 - Laser ablation of bladder polyps
- Ureter
 - Antegrade ureteral stenting
- Kidneys
 - Percutaneous nephrostomy tube placement
- Vagina
 - Laser ablation of polyps
 - Laser ablation of persistent paramesonephric remnant
