

Commander David Wong, MD, is Chief of the Epidemiology Branch of the National Park Service (NPS) Office of Public Health in Albuquerque, NM. His primary duties include responding to infectious disease cases and outbreaks, developing surveillance systems, and coordinating park-based public health programs and research activities. Through his work, Dr. Wong works closely with veterinarians, ecologists, biologists, and other One Health practitioners. His talk will utilize case studies to highlight how One Health is central to the NPS mission to protect the health of people, animals, and our environment.

From 2002–2006, Dr. Wong was a medical epidemiologist at the Centers for Disease Control and Prevention (CDC) where he primarily conducted sexually transmitted diseases (STD) research in large U.S. cities and among Native Americans. He received his MD from Duke University in 1998. He completed his pediatrics residency at the Children’s Hospital of Philadelphia in 2002, and then joined the Epidemic Intelligence Service (EIS) fellowship at CDC.
